SUMMARY

UX Designer with 10+ years designing and shipping production interfaces at Texas Instruments, backed by 14 years of front-end development experience. Skilled at translating ambiguous, cross-functional problems — content autonomy for marketing teams, responsive data-heavy product pages, public-sector information design — into shipped, measurable design solutions. Comfortable working across the design-to-code boundary, from Figma prototypes to React/WordPress implementation.

SKILLS

Design: Figma, Adobe Creative Suite **Development:** ReactJS, NodeJS, HTML/CSS/JS, Bootstrap, BackboneJS, WordPress

EXPERIENCE

UX Designer — Texas Instruments

Feb 2016 – Present

- Designed a customizable homepage carousel widget on a third-party platform, enabling the marketing team to override default slides with audience-targeted, A/B-tested content across multiple translated regions.
- Redesigned the responsive end-equipment reference diagram (EERD) page — combining block diagrams with related product info — into an adaptive layout that holds up across desktop, tablet, and mobile.
- Improved diagram submission workflow for engineers by giving them a clearer picture of how designs render on the live page, reducing rework.
- Partnered cross-functionally with marketing and engineering stakeholders to turn ambiguous content and display requirements into shipped design solutions.

Redmark Media, LLP — Freelance UX Designer — REACT Task Force (Santa Clara County DA)

Jan 2015 – 2016

- Designed and built a public-facing WordPress website for a multi-jurisdictional cybercrime task force, covering crypto scams, pig butchering, ID theft, and high-tech crime.
- Built the site for non-technical staff to self-manage, giving the task force full content autonomy to publish timely updates and scam alerts without engineering support.

UX Developer, Front-End — FriendFinder Network

Jan 2000 – Dec 2014

- Maintained the front-end of multiple owned and operated websites using Adobe Creative Suite, HTML/CSS/JS, Bootstrap, and BackboneJS.

EDUCATION

Bachelor of Fine Arts — San Jose State University
